SKILLS

- HTML
- JavaScript (ES6+)
- Bootstrap
- Tailwind CSS
- Next.js
- Express.js
- MongoDB (NoSQL)
- GitHub
- Npm
- Axios
- CSS
- Redux
- React.js
- Responsive Design
- Node.js
- RESTful APIs
- Version Control (Git)
- Vite
- Html5-qrcode
- Chart.js

PROFESSIONAL SUMMARY

Tech-savvy Full Stack Web Developer proficient in fundamental front-end languages and back-end technologies. In-depth knowledge of HTML/CSS, Javascript and React.js, Next.js for frontend, and Node.js, Ejs and MongoDB for backend. Analytical and precise professional with 3 years of hands-on experience taking charge of front and back-end web development. Skillful creating servers and databases for functionality and designing and developing APIs. Hardworking collaborator with track record of superior results.

WORK HISTORY

Full Stack Web Developer, 11/2023 - Current

New Horizons – Lagos Nigeria (Remote)

- Mastered HTML, CSS, JavaScript, and React.js to build dynamic and responsive user interfaces
- Created projects like an e-commerce site and a Qr code app using Tailwind CSS and REST APIs

- Learned Git/GitHub for version control and collaborative development.
- Developed frontend applications, integrating HTML5-QRcode for seamless QR scanning, Axios for efficient API handling, and Chart.js for dynamic data visualization.
- Implemented smooth UI animations using AOS, managed state with Context API, ensuring scalable and maintainable architecture.
- Optimized SEO and performance by implementing Next.js server-side rendering (SSR) and static site generation (SSG), improving page load speed and search engine rankings.
- Published an npm package (Create-tailwind-react-vite), streamlining React, vite, and Tailwind CSS setup for developers.
- Deployed applications on platforms like vercel, Netlify, and Render optimizing performance and scalability.
- Designed and maintained a **Redux Toolkit** store, managing state with slices and leveraging its built-in features for efficient and scalable application state management.
- Built a real-time order summary in the shopping cart, dynamically updating the total price and item count as products are added, removed, or updated.

Front End Developer, 11/2022 - 11/2023

Top Group Technologies – Largo Maryland (Remote)

- Coded using HTML, CSS, and JavaScript to develop features for both mobile and desktop platforms.
- Utilized HTML, CSS, and JavaScript to create visually appealing and responsive web pages that met client requirements.
- Troubleshoot technical issues related to front end development, ensuring prompt resolution to maintain project timelines.
- Developed a QR code generator that dynamically creates QR codes from user input text
- Implemented a download feature to save QR codes as PNG images
- Added a clear functionality to reset the input field and remove the generated QR code
- Utilized React and the qrcode.react library for seamless QR code generation and rendering.
- Worked closely with UX/UI designers to translate their designs into functional web applications.
- Developing hands-on expertise in Node.js, Express.js and MongoDB to design and build scalable RESTful APIs.
- Implementing authentication, data modeling, and server-side logic to enhance backend functionality.
- Proficient in Git/Github for version control, collaboration and code management.

EDUCATION

OND: Computer engineering, 11/2023

Federal Polytechnic Ilaro - Ilaro
